FYI,

Our recent paper identifying 12 new polyfluorinated compounds in water was picked up in this special issue. It involved non-targeted screening approaches of surface water collected in the Cape Fear river. I think SSWR and CSS could get equal kudos for this work as Andy and I were both involved.

Dear Mark,

I am writing to let you know *Analytical Chemistry*, *Environmental Science & Technology*, *Environmental Science & Technology Letters* launched the virtual special issue "Water Analysis for Emerging Chemical Contaminants" on January 20. Your article "Identification of Novel Perfluoroalkyl Ether Carboxylic Acids (PFECAs) and Sulfonic Acids (PFESAs) in Natural Waters Using Accurate Mass Time-of-Flight Mass Spectrometry (TOFMS)" was included.

I'm sure you'll enjoy reading the collection of 20 papers:

Torsten C. Schmidt and Jennifer Field wrote a great highlighting editorial:

Congratulations on being featured! Thank you for your support of ACS Publications.

Sincerely,

Nella
